Dr. Anjelica Gonzalez Wins MVP at Yale Pitchfest 2020

December 9, 2020

New Haven, CT – Dr. Anjelica Gonzalez, co-founder, and inventor of the technology behind Aero Therapeutics, participated in [Yale University's Lifesciences Pitchfest](#) competition on 03Dec2020. Dr. Gonzalez won two awards during the competition: the Audience Choice award and the Most Valuable Pitch award.

Yale Pitchfest is a yearly pitch competition for faculty innovators who are Semifinalists in the Blavatnik Fund's grant cycle. Finalists are selected every January and awarded by May.

The [Blavatnik Fund for Innovation at Yale](#), made possible by a generous grant from the Blavatnik Family Foundation, supports Yale faculty in the commercialization of applied research and technology in the life sciences. The Fund aims to bridge the gap between innovative, early-stage life science research and successful development of high-impact biomedical products.
